

VISIT INTAKE SHEET

Visit date: _____ The reason for my visit today is:

- Routine Well-Woman Annual Exam
- Medical or problem-focused for:

If you discuss problems that need treatment or follow-up during your annual well-woman exam, appropriate medical coding will be assigned (which may change the way your insurance processes your claim, including co-pays).

Please be advised that your annual exam requires a specific set of health maintenance information that must be entered and/or updated in your chart by the clinical staff. The required documentation will make your total visit time between the nursing staff and providers lengthier. As a result, if you have problems or medical concerns that you wish to discuss in detail, you may need to schedule a separate problem-focused visit to allow ample time to address all of your questions and concerns. If the clinical staff is able to address them at the annual exam, your visit will be coded accordingly with both the annual and medical corresponding codes to reflect the issues discussed.
